

WE ARE GEVO

Green Transportation Summit & Expo

Heather Manuel, Director of Communications – May 2019

OUR MISSION

We are on a crusade
to reduce greenhouse gas
emissions by decarbonizing
transportation fuels

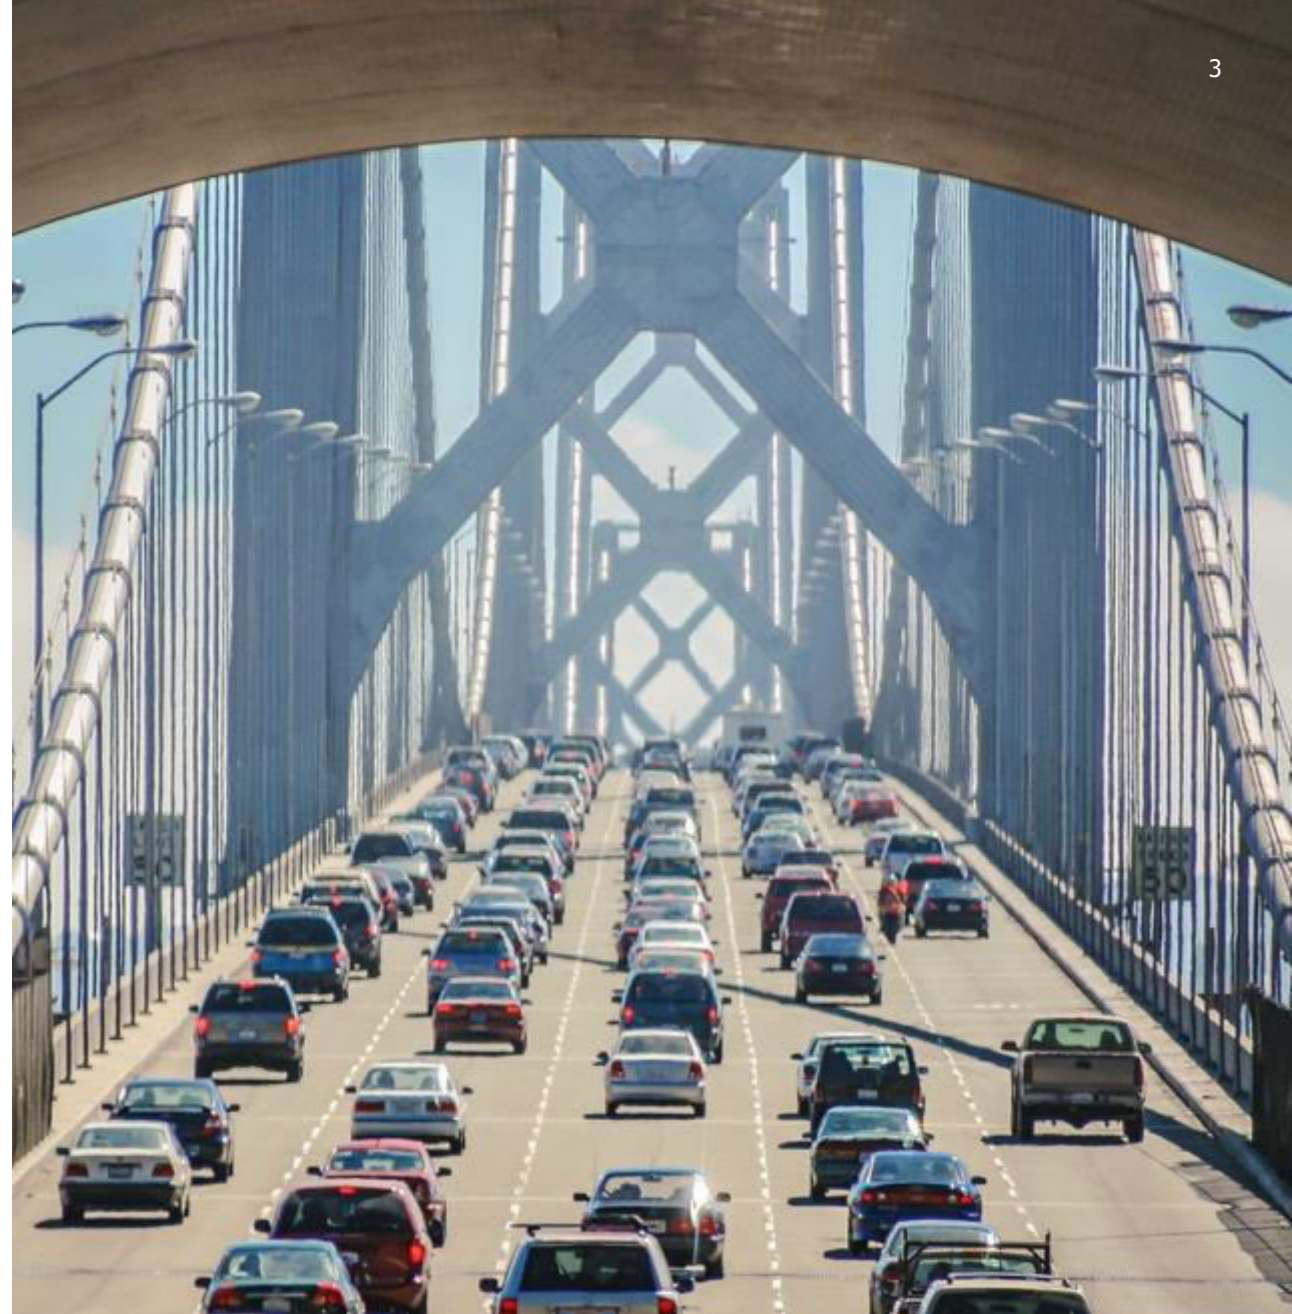

Alaska &  gevo

WHY IT MATTERS

We all create a "Petroleum Debt"

- POLLUTION
- Every time a fossil fuel is burned, a greenhouse gas (GHG) is created

Brands and municipalities will be held accountable for their GHG emissions

GEVO TECHNOLOGY & PRODUCTS ADDRESS THE NEED FOR LOW CARBON FUELS

Raw Materials

Gevo produces & sells low-carbon, renewable, high-performance fuel products

High Performance Oxygenate Blendstocks for Gasoline (Ethanol and Isobutanol)

Fully Renewable Isooctane Drop-in Fuel

Future capacities as we build out our plant

Fully Renewable Jet Fuel

Approximate expected capacities and locations for unit operations are illustrative and based on our current plans which are subject to change.

PROVING THE PRODUCTS WORK (PRACTICAL SENSE)

SEATTLE FLEET PILOT PROGRAM

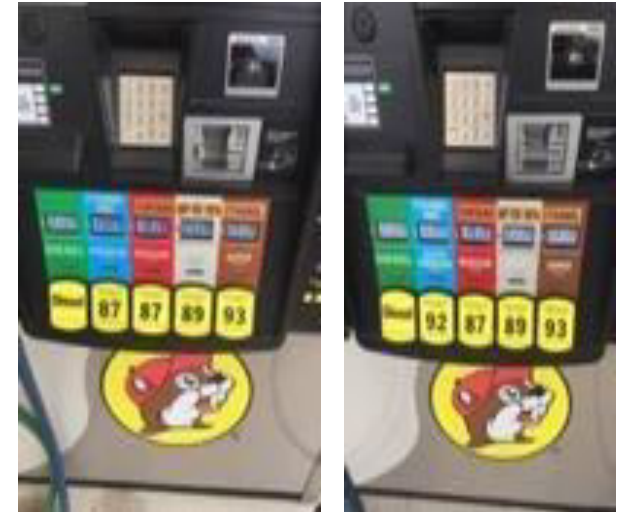

Seattle leading the way to reducing GHG with fleet vehicles

- Without the purchase of electric vehicles
 - No additional modifications to the vehicles
 - A blend of Isobutanol and gasoline
- Potential to reduce carbon footprint

BUC-EE'S ETHANOL FREE GASOLINE AT THE PUMPS

Isobutanol delivers better properties than other renewable alcohol blendstocks

- Higher energy (potential for more miles per gallon)
- Less corrosivity (less wear and tear on certain types of engines)
